

Is your baby feeding enough?

You can tell if your baby is feeding enough and getting the proper amount of food by their pee diapers. Don't worry about their poopy diapers - it's normal for babies not to poo regularly.

Day	Number of Pee Diapers Baby Should Have
1	1 pee diaper
2	2 pee diapers
3	3 pee diapers
4-6	repeat the above pattern
7	6 pee diapers

Breastfeeding & Lactation Support

If you have any concerns at all about any of the below, please contact us. Our lactation consultants can help.

- amount of food your baby is getting
- painful breastfeeding
- cracked nipples
- thrush
